

Trade waste pre-treatment

Bucket traps – in-floor and in-sink models

12 December 2013

This fact sheet lists in-floor and in-sink bucket traps that are available to enable customers to comply with Sydney Water's requirements for treating your trade wastewater. You must arrange installation by a licensed plumber.

Installation of pre-treatment products must meet Australian Standards, Workplace Health and Safety standards and Sydney Water guidelines. Only pre-treatment equipment listed here should be installed in Sydney Water's area of operations, otherwise it may need to be removed at the cost of the installer.

| Manufacturer and contact details | Supplier's item |
|--|--|
| Blucher (Australia) Pty Ltd 08 8734 3426 | Floor models: 780.200.000.03s, 780.200.000.05s, 780.300.000.03s, 780.300.000.05s (stainless steel) |
