

One Tree for Me Species list: Jubilee Park, 13 Aug 2025

Showy Wattle (*Acacia decora*)

This small to medium wattle is a hardy species that is tolerant of a wide range of conditions including frost and drought. It grows well in different soil types so long as it's in a well-drained area. It flowers from April to October.

Size: 1 to 3m tall

Biodiversity value: Provides natural habitat for many species, as well as food for birds during the cooler months.

Lemon Bottlebrush (*Callistemon pallidus*)

An upright hardy shrub that flowers in spring through Summer with a profusion of yellow flowers. It grows well in moist, well-drained soil and enjoys full sun or part shade. Plus, it's drought and moderately frost tolerant.

Size: up to 3m tall

Biodiversity value: Great habitat and food source for nectar loving birds and will also attract a range of pollinators.

Tussock Grass (*Poa labillarderi*)

A perennial native Australian grass, it will grow happily in any soil, especially wetter areas. It is a cool season grass which means it holds its colour in the cooler months. It's a popular landscaping choice and good for rockeries.

Size: up to 1m tall

Biodiversity value: Provides important habitat for a range of smaller native creatures, such as lizards and birds.

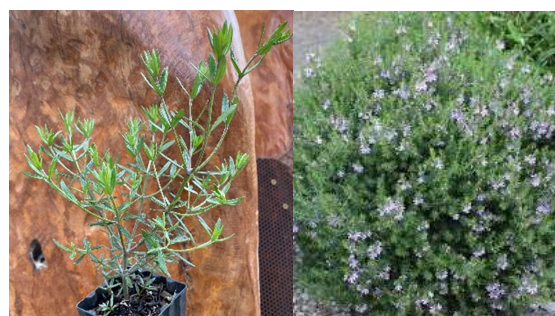

Billy Buttons (*Craspedia variabilis*)

A tufted perennial that is related to the Daisy. They like full sun and will grow well in a suburban garden, such as a rockery, or you can keep them in a pot on the veranda.

Size: up to 0.5m tall

Biodiversity value: They will attract a range of pollinators, including bees and butterflies, that will seek out the flowers.

Native Rosemary (*Westringia fruticosa*)

A hardy Australian shrub with soft grey-green foliage and pale mauve to white flowers year-round. Drought-tolerant once established. Grows in full sun and well-drained soil.

Size: up to 2m tall

Biodiversity value: Long flowering for pollinators and good foliage for wildlife habitat. It responds well to pruning so is ideal for a formal hedging or can be left in its natural form.
